General Purpose

Under general supervision, plans, schedules, coordinates, operates and maintains voice telecommunication systems that provide effective, reliable and secure internal and external communication services District-wide; oversees the day-to-day administration, maintenance and support of a variety of voice communication systems, networks and equipment including PBX and Voice Over IP (VoIP) systems, boxes, elevators, emergency broadcast systems, e-Fax system, AV systems and voice mail servers; and performs related duties as assigned.

Essential Duties & Responsibilities

The duties listed below are intended only as illustrations of the various types of work that may be performed. The omission of specific statements of duties does not exclude them from the position if the work is similar, related or a logical assignment to this class.

- Performs specialized and technical support duties related to troubleshooting, installing, configuring, and maintaining the District's telecommunication systems; analyzes, tests and evaluates network systems for voice and data communications; provides technical assistance to Network and Systems Administration staff in support of networked telecommunication systems; identifies and resolves problems and recommends adjustments to enhance productivity and efficiency.
- Installs and configures telecommunications and related computer hardware, software, programs and applications; installs, maintains and repairs communication wiring for voice, data, video and related equipment; tests and troubleshoots to ensure functional operation; works with campus technology staff to coordinate installations, adds, moves and changes to telecommunication systems.
- Configures automated network services (voice mail, identity management, converged voice/data services); optimizes the network to maximize reliability while minimizing support costs; adapts and modifies existing software to meet specific needs.
- Monitors servers and network equipment for response time, problem prevention, performance and resource utilization; implements actions to overcome result deviations.
- Helps coordinate telecommunication development projects; recommends staffing, materials and equipment needs; estimates costs and timeframes; communicates with vendors and serves as the project liaison; provides leadership to assigned support staff; provides project updates to management.
- Assesses institutional needs and recommends new technologies for the District's telecommunication network; assists with the evaluation, selection and acquisition of new network hardware and software solutions; confers with vendors and/or other agencies as needed;

researches options and analyzes costs/benefits of implementation; analyzes integration issues; determines communication requirements for new equipment installation; prepares reports and recommendations for management regarding the purchase of hardware, software and peripherals.

- Researches, evaluates and recommends equipment, tools and utilities to improve the quality of support for telecommunication services; recommends procedures, structures and contracts for support and maintenance of equipment; provides ongoing assessment of security risks; recommends proactive measures to maintain the integrity of the telecommunication network; implements approved telecommunication security procedures.
- Supports large-scale implementation of new telecommunication network processes, upgrades and equipment rollouts; implements District-wide network upgrade strategies and procedures; troubleshoots and resolves conversion and implementation problems; assists with acceptance testing for new telecommunication cabling installation performed by contractors or consultants.
- Prepares and updates telecommunication activity logs and reports; prepares specifications and requisitions for telecommunication supply needs.
- Orders and maintains appropriate level of telecommunication equipment and supplies.
- Functions as the primary contact for District and College technical staff on telecommunication issues; trains users on proper use of equipment.
- Backs up Audio Visual Technician including setting up equipment for trainings, public outreach and special events including amplifiers, wired and wireless microphones, speakers, equalizers and cabling; operates complex computer content display systems; monitors equipment functionality during events and troubleshoots any equipment failures; documents equipment usage and maintains an inventory database of AV equipment; handles surplus equipment functions following established procedures; may assist in training end users on equipment operation.
- Demonstrates sensitivity to and understanding of historically minoritized groups and participates in professional development activities to increase cultural competency to enhance equity-minded practices within the District.

OTHER DUTIES

- Serves as the primary contact with equipment vendors and the local telephone provider.
- Monitors trends and developments in systems telecommunication technologies; consults with vendors and other sources on industry and product direction, functionality and capabilities.
- Attends various meetings and participates on committees as required.
- Performs related duties as assigned.
